

Spin and Add Game

Rationale:

Practice using 200s Chart, math facts (addition/subtraction).

Goal of the Game:

To have the most points after seven rounds.

Materials:

Use a pencil and paper clip for a spinner. Each player will need one spinner for the Spin and Add Playing Boards and the Spin and Add Score Sheet (Each provided at the end of this document).

Rules:

- Player 1 spins the spinner three times on the playing board (if the spinner lands on a line use the lesser of the 2 values).
- Player 1 finds the sum of the three numbers (encourage children to skip count by 5s to find sums). Establish rule for wrong sums, i.e. lose the round or have to re-spin.
- Player 1 records the sum on the Spin and Add Score Sheet.
- Player 2 takes a turn doing the same as above.
- Players 1 and 2 compare their scores for the first round.
 - The player with the highest sum gets one point and records it on the Score Sheet.
 - If the scores are a tie, both players get one point.
 - Players continue until seven rounds have been played.

Spin and Add Score Sheet

Each player records the sum of three spins for each round. Player 1 and 2 compare their sums. The player with the higher sum gets one point. If the sums are the same, both players get one point.
